## **INTERCULTURAL COMMUNICATION OF FOREIGN STUDENTS IN THE PROCESS OF PROFESSIONAL TRAINING**

Human history has been a history of individual countries, peoples and cultures until recently, today it is becoming a global unified history: everything that happens in the lives of individual countries, in one way or another, affects the life in other parts of the globe [2].

Intercultural communication is a special form of communication between two or more representatives of different cultures, during which information and cultural values of interacting cultures are exchanged [1].

The subject of intercultural communication is contacts that occur at different levels, in different audiences, in bilateral, multilateral, and global aspects. The purpose of intercultural communication should be to create conditions for the development of a constructive dialogue that is equivalent to representatives of other cultures [2].

In the context of integration and globalization is constantly expanding the spheres of international communication, which affects the further development of the dialogue representatives of various national and cultural communities and organizations. The development of interethnic communication is possible through the interaction of various cultures. In these circumstances, the education of foreigners should be considered as a means of subsistence in a new social environment, and the goal of learning is to form a new social environment. intercultural communication of students [2].

That is why the main goal of the modern world is to study different cultures through learning. It is necessary to overcome the cultural barrier between countries.

Training of foreign students is an important factor in the formation of the Ukrainian state as a whole an equal partner in creating a global educational space. According to the Main Department of statistics of Ukraine, it is noted constant growth in the number of foreign students in Ukrainian higher

education institutions educational institutions. It should be noted that every year the geography of countries with international students are constantly expanding [2].

The main part of students who come to study in Ukraine, absolutely does not know the culture of Communication, Speech and everyday etiquette, and therefore, an important element of pedagogical activity is to teach them cross-cultural and interpersonal communication in New conditions. Pedagogical communication is implemented in the classroom (during and after classes), in extracurricular activities time [2].

Culture teaching in foreign language teaching is a question countered by language teachers throughout all universities and colleges in the world.

Communication between the teacher and international students, such as representatives of different cultures, can occur in different situations, be successful or lead to culture shock. Conditions for successful communication they depend on the correct construction of the educational process, as soon as possible educational, socio-psychological and other types of adaptation, contact students with a teacher, other students, availability of educational materials, provision of international faculties for foreign citizens with competent specialists, as well as from many other necessary components [2].

It should be noted that the elimination of ethnic, racial and cultural barriers depends on the will, desire and ability of people to resolve inter-ethnic, inter-religious and intercultural conflicts. This is only possible on the basis of understanding and respect for social and cultural differences between peoples of the world and the practical implementation of the fundamental principles of intercultural communication [3].

Thus, professional intercultural communication is a component of the general culture of the student, which includes a combination of knowledge, skills and values, which contributes to the efficient solution of communicative tasks in a foreign language sociocultural environment [3].

But unfortunately, the current situation in Ukraine doesn't allow to host foreign students. Despite this, nothing prevents from communicating online and traveling abroad to communicate.

Undoubtedly, now is a very good opportunity to break down the cultural barrier, because people need to be together, support each other with other countries more than ever before. when the war is over, many foreign students will come to Ukraine. It is important to make everyone want to come and study at Ukrainian universities.

### **ОСОБЛИВОСТІ ФОРМУВАННЯ МІЖКУЛЬТУРНИХ КОМПЕТЕНЦІЙ У СТУДЕНТІВ-ІНОЗЕМЦІВ ТЕХНІЧНИХ СПЕЦІАЛЬНОСТЕЙ**

Полікультурність у навчальному закладі є засадничим принципом побудови якісно нової системи освіти в Україні – повага і прийняття культурного розмаїття в суспільстві, співіснування діалогічного типу без втрати кожним з представників соціуму своєї національної та культурної ідентичності, веде до духовного, культурного та матеріального збагачення соціуму. Расові, етнічні, культурні чи соціальні відмінності при такому підході стають чинниками інтеграції його в єдине багатокультурне ціле.

В сучасних економічних умовах, коли випускники технічних спеціальностей мають змогу працювати безпосередньо за кордоном та в офісах закордонних підприємств на території країни, відповідно вони у своїй професійній діяльності мають спілкуватися з представниками інших культур. Через цю умову, важливим є формування у майбутніх фахівців адаптації до іншої культури, цінностей, звичаїв тощо, та пояснити чому важливо побудувати стосунки з представниками тієї чи іншої культури. Це стає можливим, якщо людина живе в міжкультурному середовищі тривалий час і активно спілкується з
